## TEST 5B (Unit 5)

### Reading

8 Read the text below. For every paragraph 1-3 choose the right headline (A-D). Write the appropriate letters next to paragraph numbers. One headline is extra and does not match any of the paragraphs.

- A The evolution of TV
- B From fantasy to reality
- C The future of television
- D The age of technology

### The Future at our Fingertips

**1** ☐ Technology has never developed as quickly as it has in the early 21<sup>st</sup> century. In recent years we have witnessed a revolution in personal communication technology with the introduction of the smartphone. But what about in the world of home entertainment? Welcome to the smart TV.

**2** ☐ TV has been entertaining families for many years now. It has changed from black and white to colour, from analogue to digital. By now, we are all used to controlling our TVs with remote controls instead of getting up to change the channel, but all that may be about to change.

**3** ☐ What if you could change the channel with a wave of your hand or just by telling the TV what you want? This may sound like something from *Star Trek*, but it is actually real. Gesture and voice control have stepped out of science fiction films and into our living rooms. The new TVs on sale today allow you to do so much more than just watch your favourite programmes.

# TEST 5B (Unit 5)

## Writing

10 Your teacher has asked you to write an essay (120-180 words) presenting the pros and cons of social networking. In your essay:

- state the topic.
- explain the advantages and disadvantages with examples.
- give your opinion.

Advantage – easy and free	Disadvantage - dangerous
it's easy to keep in touch with friends who live far away	people can see your private information
don't have to pay, unlike phone calls and text messages	people can pretend to be someone they're not
